| <b>DESCRIPTION OF THE COLLEGE</b>                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.1. <i>Objectives of the course</i>                                                                                                                                                                                                                                                                                                                                                                      |
| Through the course, students are introduced to the concept of the knowledge society and the terminology necessary for the successful application of knowledge and concepts in knowledge and innovation management in the organizational environment. The course offers students an insight into different approaches to knowledge and innovation, based on the real experiences of leading organizations. |
| 1.2. <i>Requirements for enrolment in the course</i>                                                                                                                                                                                                                                                                                                                                                      |
| <b>Enrolled in professional graduate study</b>                                                                                                                                                                                                                                                                                                                                                            |
| 1.3. <i>Expected learning outcomes for the course</i>                                                                                                                                                                                                                                                                                                                                                     |
| <b>Learning outcomes mean the knowledge, skills and competencies that a student has acquired by fulfilling obligations and passing exams in the subject of Knowledge and Innovation Management, which means that students are able to:</b>                                                                                                                                                                |
| I1      Analyze knowledge management models.                                                                                                                                                                                                                                                                                                                                                              |
| I2      Distinguish between types of knowledge and innovation in different organizational forms.                                                                                                                                                                                                                                                                                                          |

- I3 Develop a strategic knowledge management plan.
- I4 Assess the main challenges of innovation management and recommend a solution to deal with them.
- I5 Design an innovation strategy taking into account the associated risks and the regulatory framework.
- I6 Propose a plan for the introduction of a new product or service based on the categorization of the steps of the innovation process.

Obligations of students                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |    |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                  |    |
| <p>Student obligations are prescribed in detail by the Statute, the Study Regulations and the Instructions on Student Obligations. The key obligations of students are:</p> <p><b>ATTENDANCE AT CLASSES:</b> students are obliged to attend classes, actively follow lectures and exercises and participate constructively in classes, and in order to acquire the right to take the exam, it is necessary to attend classes in the percentages prescribed by the Study Regulations. For each student, their presence in class is recorded through the Infoeduka digital office system. The minimum commitments are;</p> <ul style="list-style-type: none"><li>• Full-time students must attend at least 70% of the total number of classes to be eligible to sign.</li><li>• Part-time students need to attend at least 50% of the total number of teaching hours to be eligible to sign.</li></ul> <p><b>EXAM:</b> in order to achieve a positive grade in the subject, it is necessary to achieve at least 54 points in the subject, but also at least 50% of points for each learning outcome. The method of taking the exam is described in more detail in the item Assessment and evaluation of students' work during classes and at the final exam.</p> <p><b>*FINAL EXAM</b> – a student who has not met the conditions for passing the exam during the continuous examination (has achieved a total of at least 54 points in the course and met the lower point threshold for the acquisition of each learning outcome, i.e. at least 50% of the points of each learning outcome), may take the learning outcomes of the course at the final exam.</p> <p><b>INDIVIDUAL PROJECT:</b> the student is obliged to participate in an individual project that verifies the practical application of knowledge.</p> |    |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                  |    |

**1.7. Monitoring of student work (add X with the appropriate form of monitoring)**

|              |   |                                    |  |            |  |                   |  |

**1.8. Assessment and evaluation of students' work during classes and at the final exam**

*Assessment and evaluation of students' work during classes and at the final exam is carried out on the basis of the Study Regulations of the EFFECTUS University of Applied Sciences.*

*The linking of learning outcomes, teaching methods and assessment of learning outcomes is performed as follows:*

|    | Attendance | Written exam | Design | Practical work | Total |
|----|------------|--------------|--------|----------------|-------|
| I1 |            | 16           |        |                | 16    |

**JUDGING:**

*In order to achieve a positive grade in the course, the student must cumulatively meet two conditions: achieve a total of at least 54 (fifty-four) points in the course and meet the lower point threshold for the adoption of each individual learning outcome, which is 50% of the total points of the learning outcomes.*

*Grades are calculated based on the following distribution of points:*

| NUMBER OF POINTS | RATING           |
|------------------|------------------|
| 0,00 – 53,90     | Insufficient (1) |
| 54,00 – 64,90    | Sufficient (2)   |
| 65,00 – 79,90    | Good (3)         |
| 80,00 – 89,90    | Very Good (4)    |
| 90.00 and more   | Excellent (5)    |

*The evaluation is carried out in a transparent manner by collecting points. The course is valued with 100.00 points (with the possibility of achieving an additional 8 points on the Challenge learning outcome).*

*CHALLENGE LEARNING OUTCOME - the student has the opportunity to earn an additional maximum of 8 points through the Challenge learning outcome; The student independently chooses one of the activities proposed in the first lesson, and has the opportunity to independently propose an activity by which he wants to increase the number of points and, with the consent of the course holder, achieves them according to the criteria of the subject. Points for the Challenge learning outcome are not distributed according to the learning outcomes, but the number achieved is an additional number of points to the total number of points achieved according to the learning outcomes.*

*Before taking the final written exam, each student must meet the prescribed conditions, which primarily means that they have attended the % of classes determined by the Study Regulations and that they have received an electronically encrypted permission to take the exam.*

*1.9. Required literature and number of copies in relation to the number of students currently attending classes in the course*

*1.10. Supplementary literature*

*Prester, J. Innovation Management, 2010, Sinergija Zagreb*

*North, K. Knowledge Management, 2007, Slap Publishing House, Zagreb*

*1.11. Quality monitoring methods that ensure the acquisition of output knowledge, skills and competences*

- *processing and analysis of exam results,*
- *conducting a survey among students,*
- *evaluation and self-evaluation of teachers,*
- *the results achieved, the level of understanding and knowledge during the project development,*
- *the achieved results and the level of knowledge presented during the preparation and defense of the final thesis (of students who choose the graduate thesis in this subject),*
- *analysis of the reports of the head of the quality center, and*
- *Feedback from students who have already graduated about the usefulness of the content of this course in the performance of the tasks they are engaged in.*
